FOR IMMEDIATE RELEASE:

STEAM Engine – Creative Ideas – Rich Conversation at the Neville

Green Bay, WI—February 16, 2017— The Neville Public Museum is proud to host STEAM Engine on February 21, 2017 at the Neville!

You've heard of STEM. We've decided to crank up the creativity and roll out the STEAM Engine. The inclusion of the Arts completes the acronym: Science, Technology, Engineering, Arts and Mathematics. The STEAM Engine plows a path for anyone in Green Bay that wants to expand an idea to engage in a noncompetitive and encouraging network of professionals.

Faculty from UWGB, St. Norbert College, and NWTC will provide perspectives in the fields of Science, Technology, Engineering, Arts and Mathematics. We've also linked with multiple public and private businesses working in the STEAM fields to participate in the event.

The first of four STEAM Engine events will take place on February 21st at 6:30pm in the Neville Public Museum auditorium. Phase One will be a series of 4-5 ten minute presentations covering a broad range of topics from bazaar artistic installations to cutting edge technological advancements and ANYONE can be a presenter! At the end of each presentation a brief Q and A will take place with field professionals and the audience.

For more presenter and sponsorship information on the STEAM Engine contact Kent Hutchison at:

Phone: 920-791-1237

Email: steamenginegb@gmail.com

Web: www.steamenginegb.com

The STEAM Engine is Sponsored by: The Neville Museum, Tiletown Brewing Company, The City of Green Bay.
